MEMORANDUM FOR:

[REDACTED]
Bobby Taylor
Jack Thomas
[REDACTED]

25X1

SUBJECT : NIPE System Capabilities Inventory

1. Attached is a proposed outline of the information we would assemble for each intelligence "resource" we might be concerned with. Initially, these resources would be those in the collection game; later we may add processing and production resources after we have a better idea of how to sort them out.

2. I am not sure what level of breakdown to go to. Things like [REDACTED] are fairly straightforward, but how do we handle the attaches--as a single "resource" or by individual posts?

3. I would appreciate it if you would go over the outline and let me know of any adds, deletions, changes, etc., you would want to have made. I would especially appreciate any anticipations you may have of the kinds of problems we will encounter in putting the inventory together and making it useful.
